Great White Shark Facts

Take a deep breath, gang, as we dive deep to get the lowdown on one of the ocean's deadliest predators, in our great white shark facts!

- 1) Great white sharks can be found throughout the world's oceans, mostly in cool waters close to the coast.
- 2) These super swimmers are the largest predatory fish (fish that eat other fish or animals) on our planet. On average, they grow to around 4.6m long, but some great whites have been measured at 6m – that's half the length of a bus!
- 3) Great white sharks are grey with a white underbelly, from where they get their name. They have a streamlined shape and powerful tails that propel them through the water at over 60km per hour!
- 4) Any creature unlucky enough to find itself in the gob of a great white is in for a nasty shock! Because this marine beast's mouth is equipped with a set of 300 sharp, trian-
